

SNOW TARPS

The Snow Removal tarpaulins is the most efficient solution to efficiently and quickly to free counter tops by snow in winter. The 6 x 6 meters large snow removal tarp is composed of two very resistant fabrics with welded insulation mats sewn risers reinforced corners and four annexes loops. Also holds the largest snow loads

SPECIFICATIONS

Weight (DIN EN ISO 2286-2)	610gsm
Fabric Type	Polyester (Woven)
Thread Count (Warp x Fill)	20 x 20 (1100D x 1300D)
Tensile Strength, Grab Method (N/5CM) (EN ISO 1421-1)	Warp 3900 x Fill 3600
Tear Strength, Tongue Method (N) (DIN 53363)	Warp 490 x Fill 450
Adhesion (N/5CM) (EN ISO 2411)	100
Abrasion Resistance	400 Cycles70° C (Does
High Temperature Resistance (DIN EN 1876-2)	Not Block)
Cold Crack (DIN EN 1876-2)	-40° C

FEATURES

- 610gsm heavy-duty PVC-coated polyester with tear-resistant stitch design for strength and lift capacity.
- Webbing extends through the center of the snow tarps to distribute weight.
- Reinforced patched corners.
- Four loops sewn on the underside for lifting.
- UV and mildew resistant and water resistant.
- Packed on pallet.
